

FACUNDO TAMBURRO

UNIVERSITY TECHNICAL GRADUATE IN PROGRAMMING | SOFTWARE DEVELOPER

ABOUT ME

University Technician in Programming with experience in web development, databases, and management systems. I currently work at the University of Buenos Aires, participating in institutional information management, internal systems development, and report generation. I am interested in backend and full stack development, with a practical approach focused on real solutions.

PROFESSIONAL EXPERIENCE

Developer / Systems Area (SUC)

University of Buenos Aires (2025–present)

- Development of internal tools in PHP and maintenance of PostgreSQL databases, focused on settlement processes and institutional information management.
- Work within the SIU ecosystem, particularly SIU-Mapuche, performing queries, data maintenance, and support for the system's operational processes.
- Development and adaptation of reports in SIU-Toba, used by the area and other sectors of the University.
- Survey of needs and creation of solutions that optimize workflows and the management of large volumes of information.

Administrative Assistant – Human Resources

University of Buenos Aires (2022 - 2025)

- Management and updating of personnel databases, ensuring the correct uploading and maintenance of administrative information for the area.
- Monitoring of retirement notification procedures, checking documentation, progress reports, and compliance with established deadlines.
- Use of systems for the administration of personnel files, records, and registers.
- Preparation of control spreadsheets and administrative reports to facilitate the organization of information and the monitoring of internal processes.

Sales Advisor & Network Management

Kif-Kif Wallet Factory (2021 - 2022)

- Social media management for the brand, including content creation, product photography, posts, and customer service.
- Customer service in-store and sales management, advising customers during the purchasing process. Operational support in warehouse tasks, including ordering, control, and movement of merchandise.
- Recording and control of sales and stock using tracking spreadsheets, collaborating in the organization of commercial information.
